SPRINGFIELD MARINE

MAKING BOATING BETTER

NEW PRODUCT CATALOG

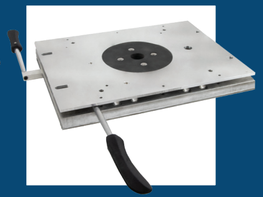

A GLOBAL LEADER IN MARINE INNOVATION

Springfield Marine Company is recognized worldwide as a leading provider of marine seating, hardware, table systems and ski tows. With the 2024 acquisition of Shark Seating, a New Zealand-based leader in marine suspension seating, and our manufacturing facility in Asia, we continue to expand our global capabilities—delivering innovative, high-quality solutions through advanced engineering, manufacturing expertise, and industry leading design. Every day, we remain focused on one goal: ***Making Boating Better*** for boaters around the world.

EXTENDING OUR LINE

Stowable Footrest System

The patent-pending Stowable Footrest delivers added boater comfort without permanently occupying valuable cockpit space. Designed to fold completely into an integrated compartment beneath the seat, the footrest remains hidden when not in use and deploys only when needed, preserving a clean, uncluttered seating environment.

Features:

- Folds up into compact 2-7/8" compartment under seat
- Extends 12" – 16" below seat
- 10" × 15" comfort-grip, anti-slip footpad
- Fits with most seating applications
- Maximizes deck space

COMPATIBLE WITH
Most Springfield Marine Seats & Seat Mounts

6G Shock Mitigating Leaning Stand

PHEXAA01

The industry's first and only shock-mitigating leaning stand, engineered with dual Shark FP4 suspensions to provide 4.5 inches of travel and up to 6G impact mitigation for two occupants. Designed for demanding marine environments, it combines advanced shock mitigation with the functionality anglers expect.

Constructed from durable 1 inch stainless steel tubing, the Leaning Stand features four integrated rod holders, a fold-down footrest, and an integrated cooler strap to maximize comfort, fishability, and valuable deck space.

Dual-occupant shock mitigation. Built for rough water. Designed to perform.

Marine Product Safety Classifications

The American Boat and Yacht Council (ABYC) has recommended marine industry seating safety standards for pedestal applications into two separate categories:

Class A — Seat designed for occupancy while the boat is at any speed.

Class B — Seat designed for occupancy only at boat speeds not exceeding five miles per hour (fishing or trolling).

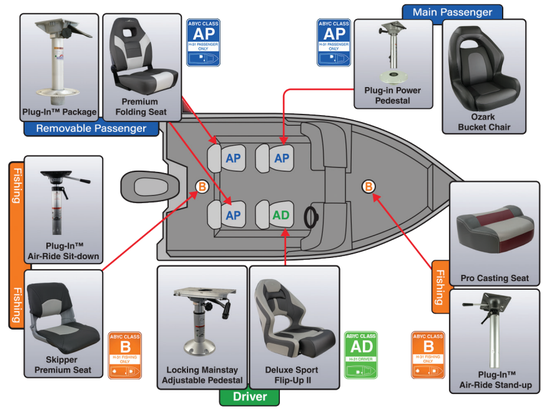

All pedestals must pass a series of tests within each of these classifications which include horizontal and vertical impacts, torque, static load, fatigue, and fastener pull testing.

There are two types of Class A seating designations:

Class AP - Passenger — Seat mount must resist 30 foot pounds of torque (non-locking).

Class AD - Driver — Seat mount must incorporate a mechanical interference lock" and resist 150 foot pounds of torque (locking).
